

how does architectural
form relate to a
cities activities?

expedient traversal

epigenetic fields

is performance a
sufficient
criterion for
architecture?

networked compression

```
node.Alive = Sum(hood.Alive)_  
*hoodWeight
```

```
If hood.Populatin > tHold Then  
node.TypeWeight = "Public"  
End If
```

dynamic connections

a particular
traversal of the
design domain

myriad agglomerations?

```
hoodNodes = node.Distance(3)
```

```
If aveHood = residential AND  
hoodConnections< tHold Then  
Call ReduceDesire(node)  
End If
```
