Detailed plans | riverfront

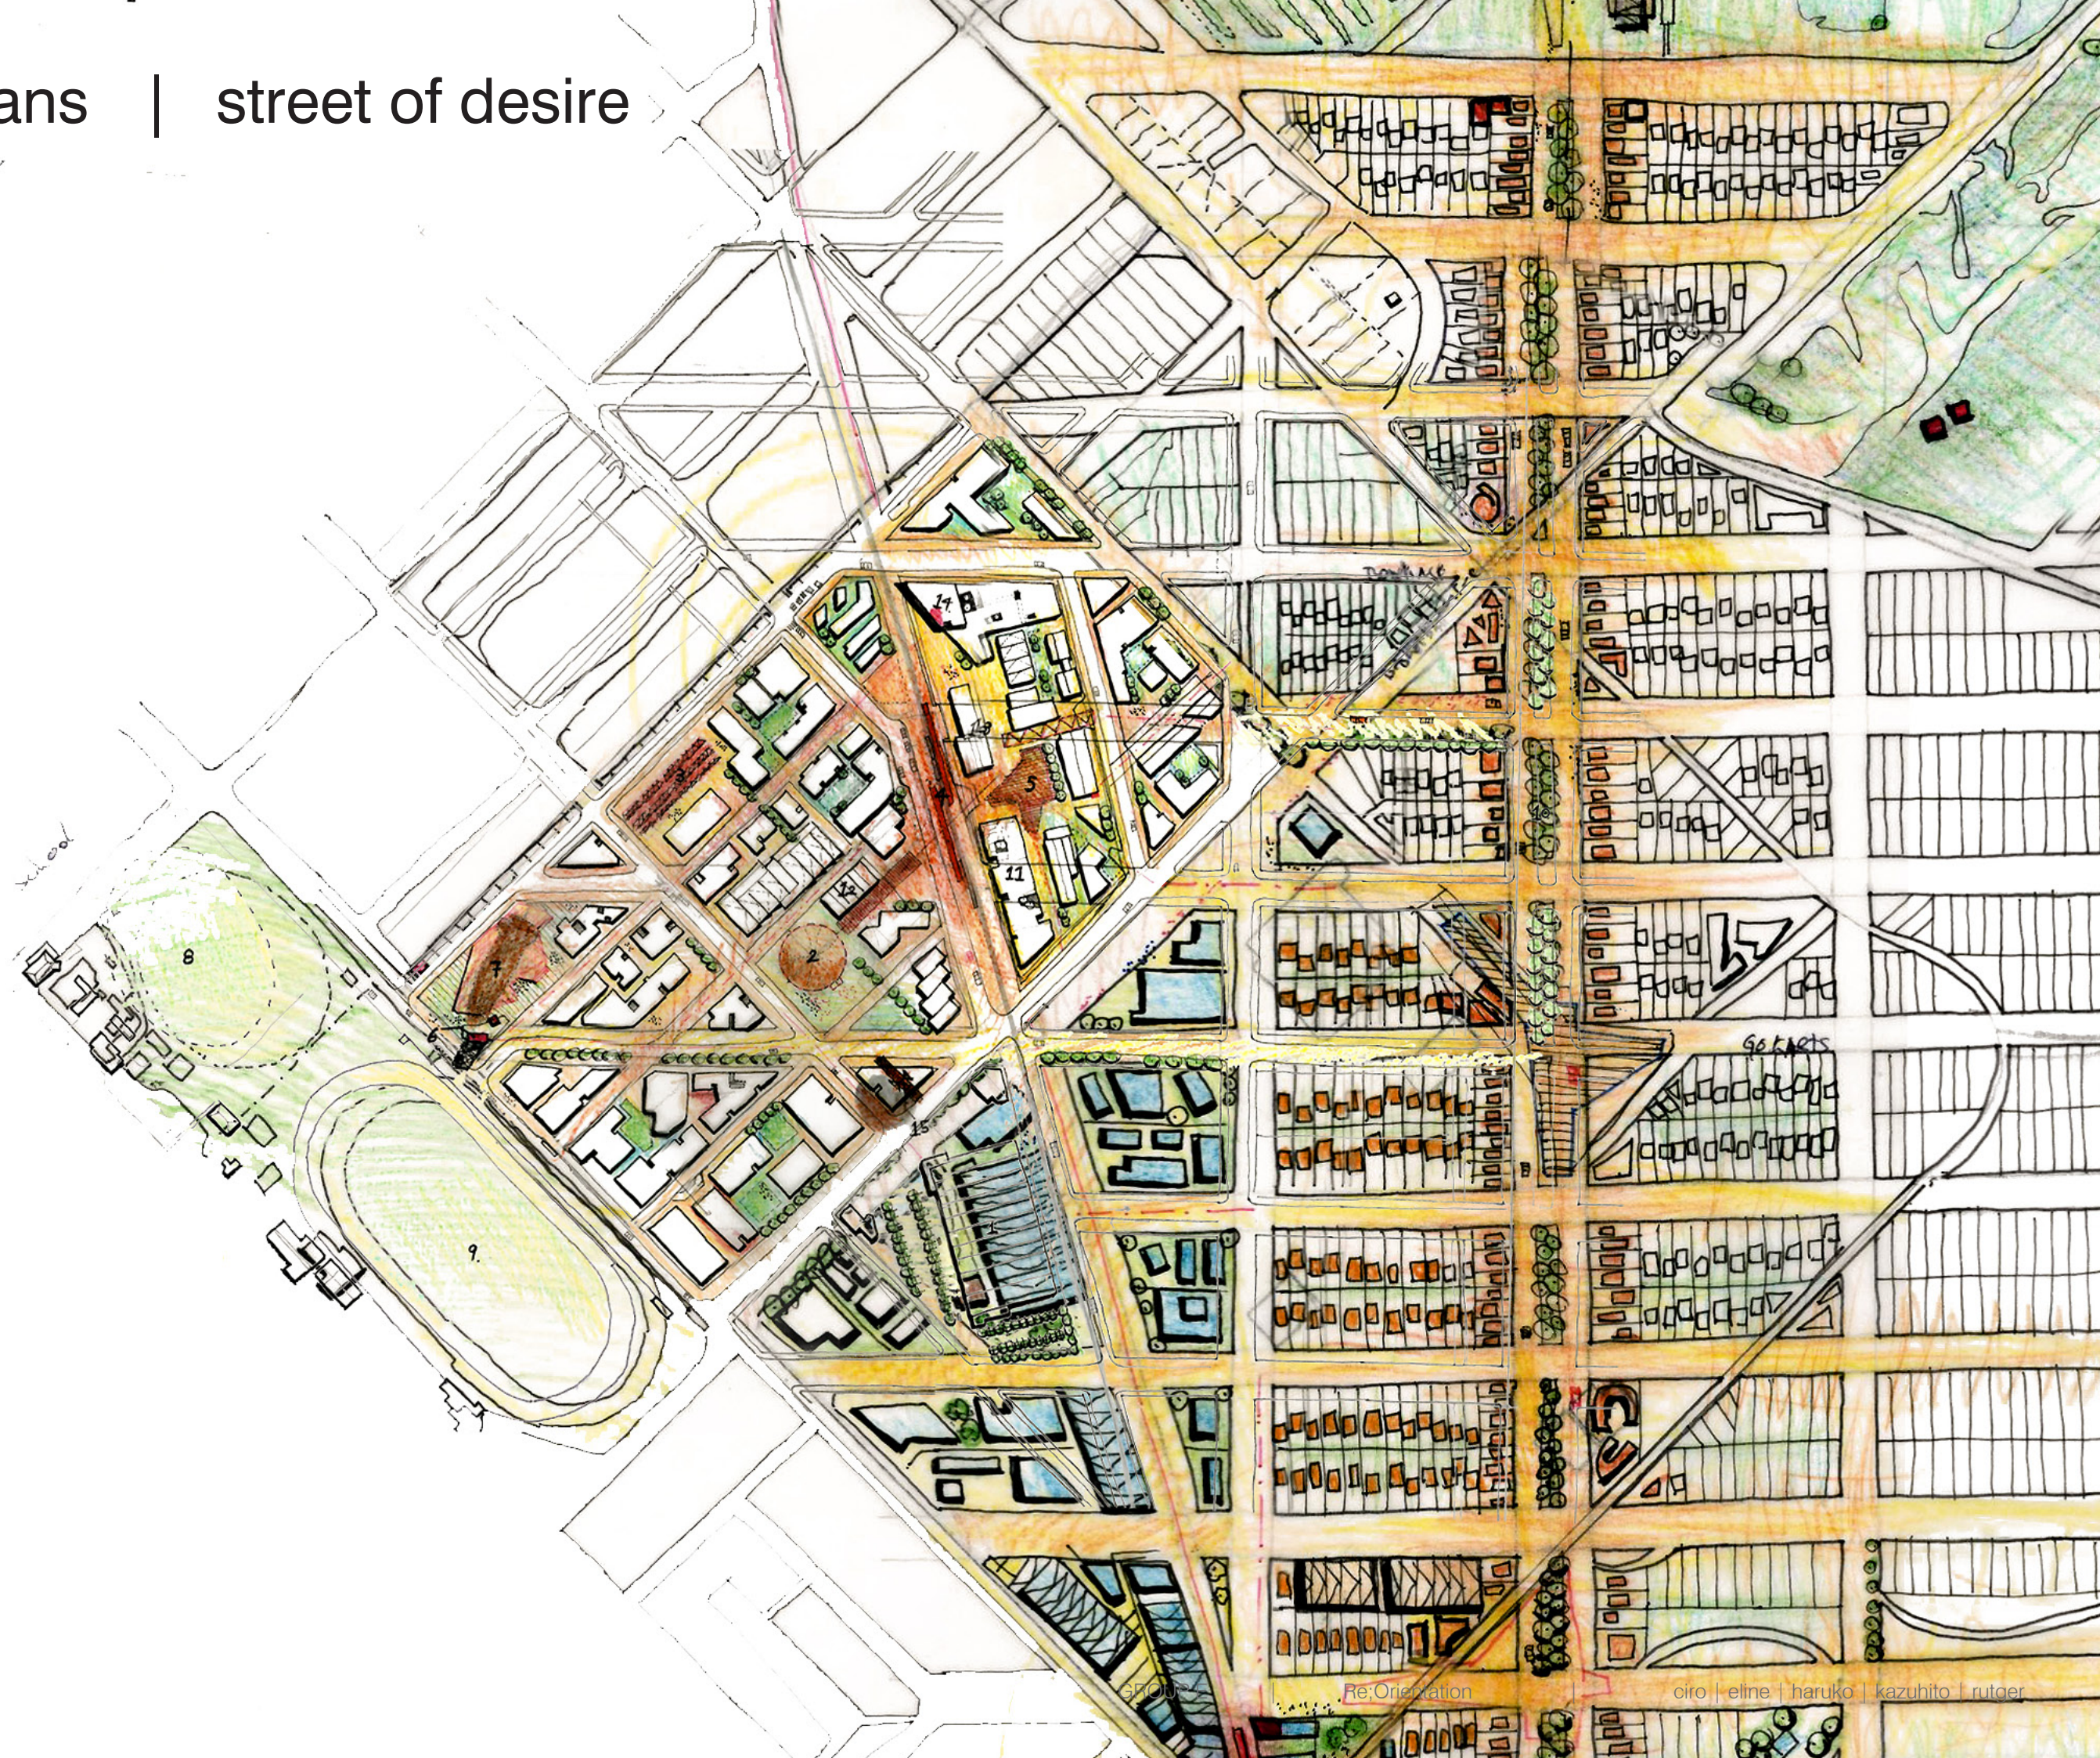

This hand-drawn architectural site plan illustrates a riverfront development. The plan features a central river or canal flowing through the site, with various land uses and infrastructure elements. Key features include:

- Waterfront Area:** A large, irregularly shaped area along the river, colored in shades of green and blue, representing a waterfront park or recreational space. It includes a small, curved pier or dock structure extending into the water.
- Urban Grid:** A structured urban layout with rectangular blocks and streets, primarily colored in yellow and orange, located to the left and bottom of the waterfront area.
- Wetlands:** A designated area on the right side of the plan, labeled "Wetlands" in handwritten text, characterized by wavy, organic shapes and green coloring.
- Infrastructure:** A prominent pink line, likely representing a railway or transit route, runs diagonally across the plan. Other lines indicate roads and pedestrian paths.
- Landmarks:** Several small, stylized buildings and structures are scattered throughout the plan, including a cluster of red buildings in the top left and a small, dark structure near the waterfront.
- Topography:** The plan uses various colors and textures to represent different landforms and vegetation, with blue for water, green for parks and wetlands, and yellow/orange for urban areas.

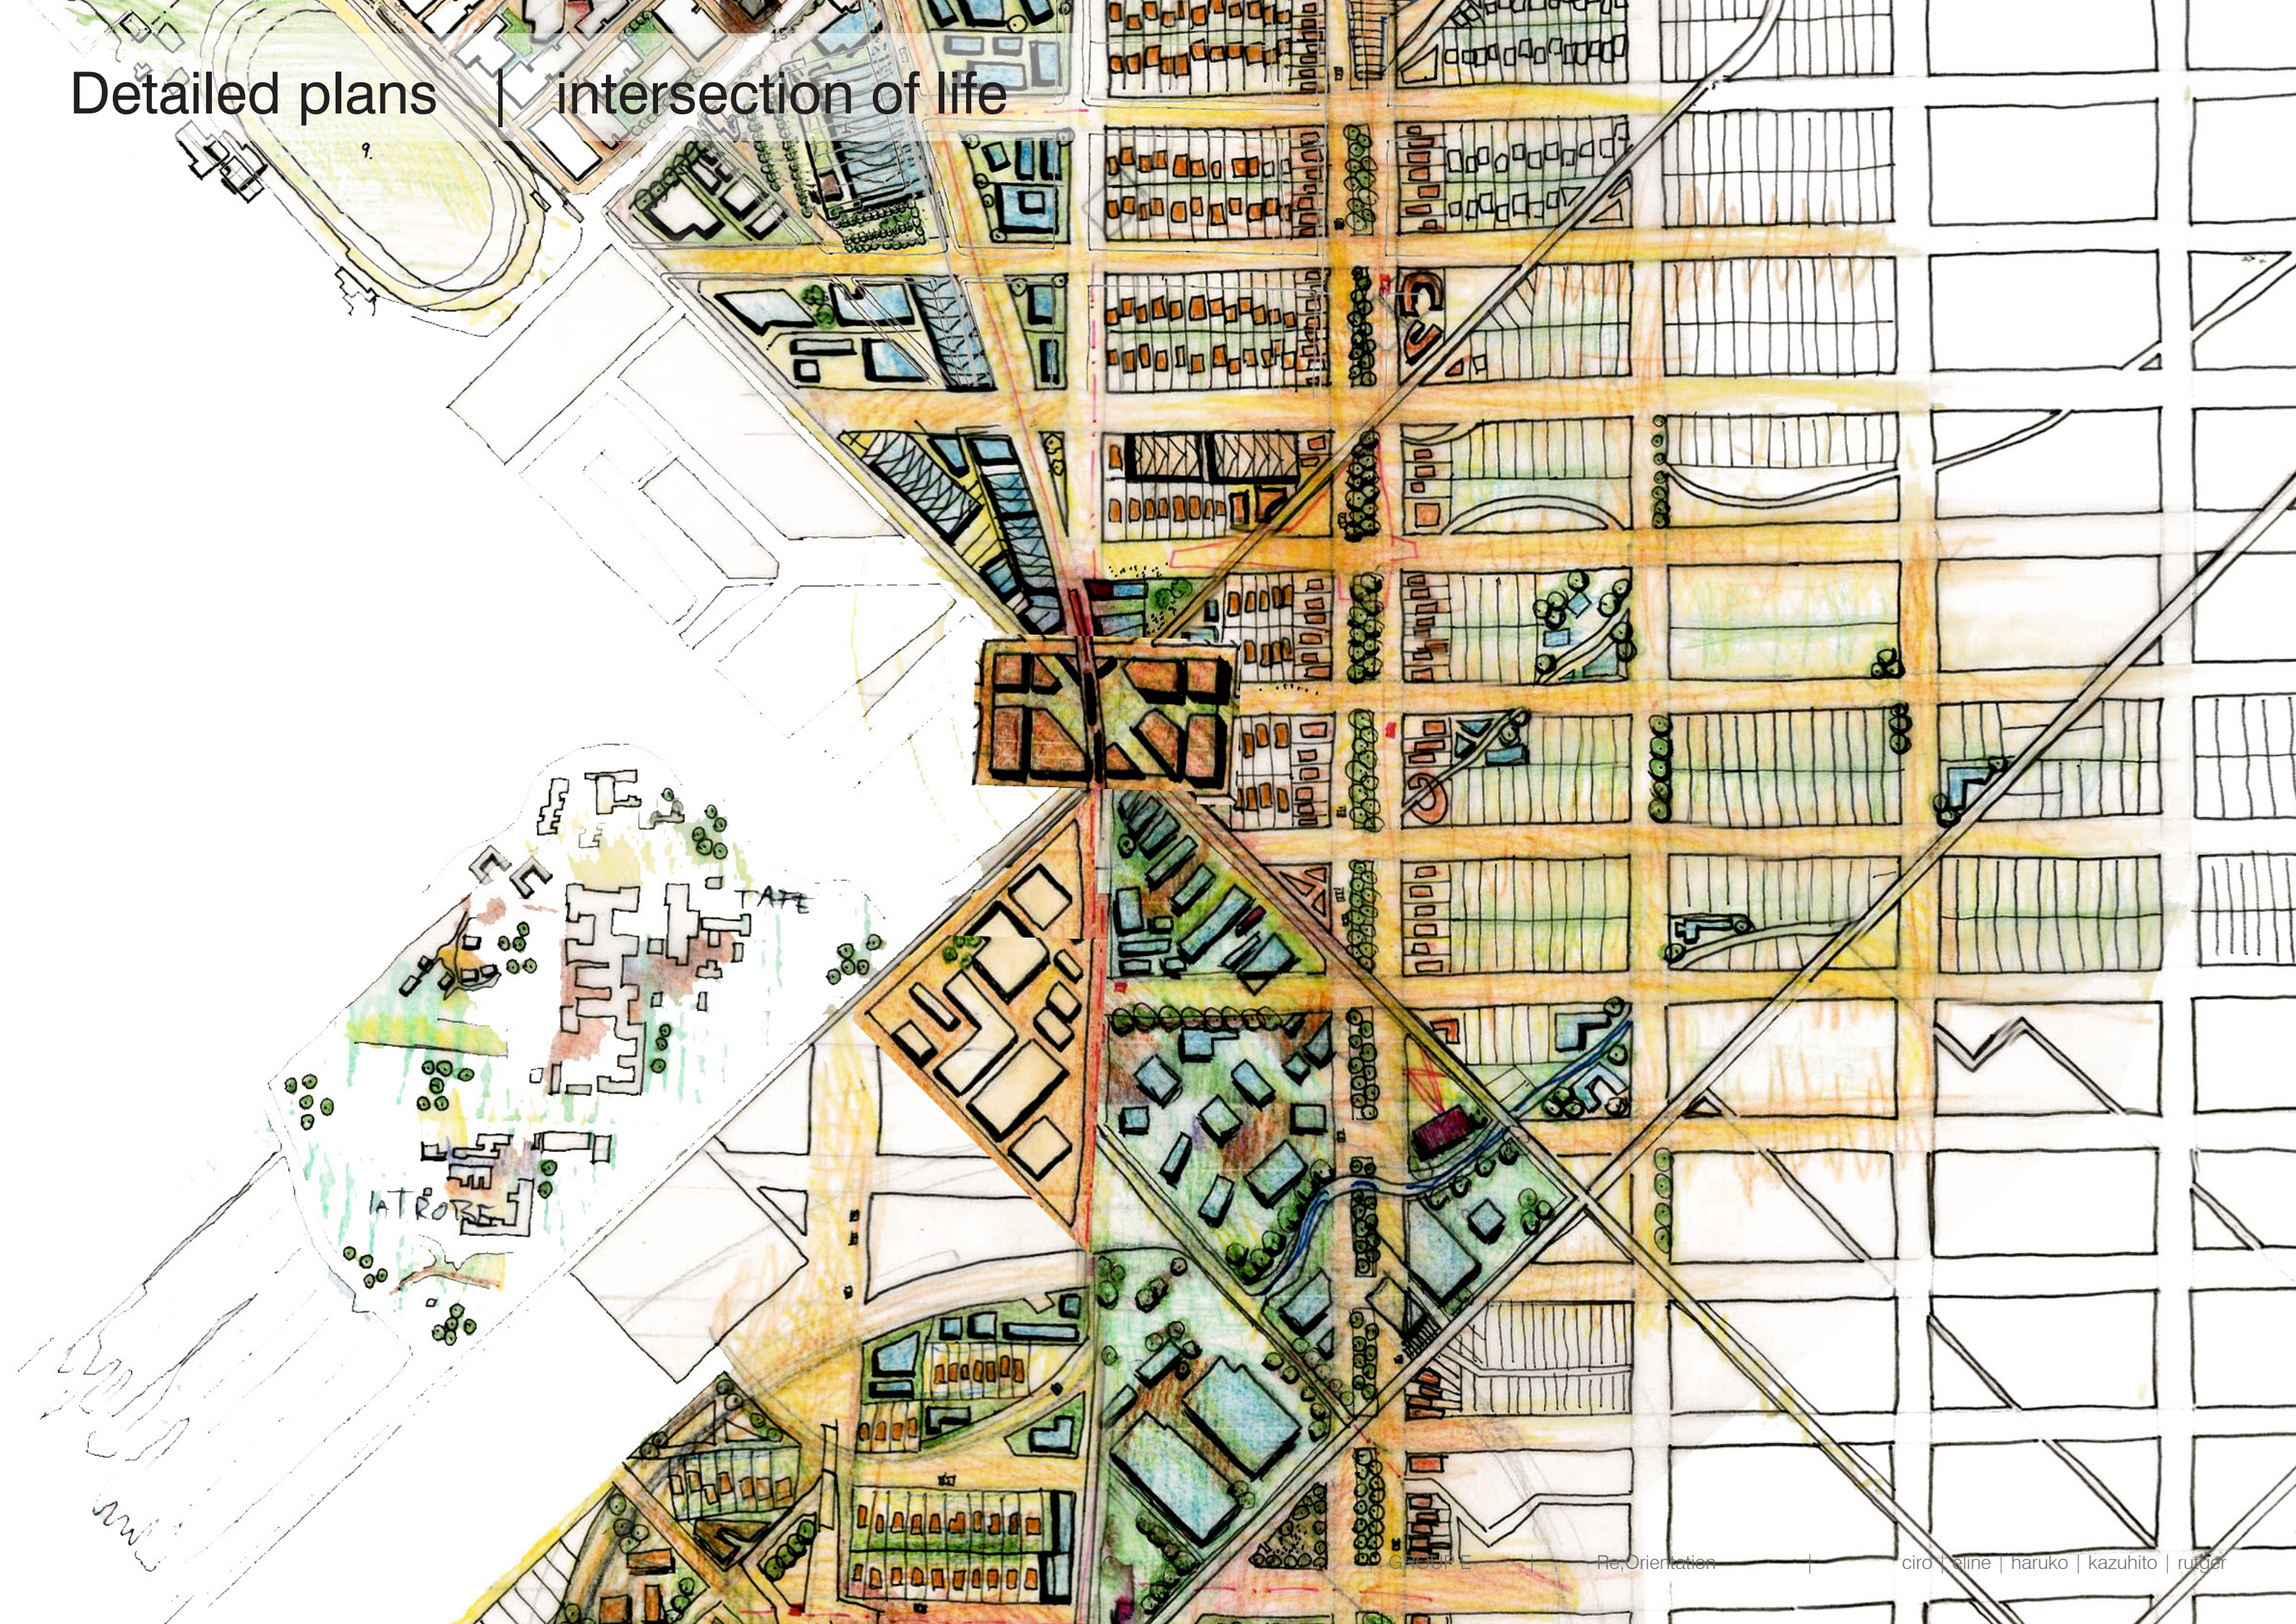

The drawing is a detailed conceptual plan, showing the integration of natural elements like the river and wetlands with urban development and infrastructure.
